

CURRICULUM VITAE

Catherine Hayward

Professor of Pathology and Molecular Medicine, and Medicine, McMaster University
Associate Dean of Graduate Studies, McMaster University (2009-present)
Head, Coagulation, Hamilton Regional Laboratory Medicine Program, Hamilton, Ontario, Canada
Hematologist, Hamilton Health Sciences and St. Joseph's Healthcare, Hamilton, Ontario, Canada
President of the International Society of Laboratory Hematology (currently in 2nd term)
Former Executive Secretary for the International Society for Laboratory Hematology
Board Member, THSNA (Thrombosis Hemostasis Summit of North America)
Co-Chair, THSNA Planning Committee
Former President of the North American Specialized Coagulation Laboratory Association (NASCOLA) for two terms
Former Treasurer of NASCOLA
Former Chair and Member, Royal College of Physicians and Surgeons of Canada Advisory Committee on Clinician Investigator Training
Former Chair, Vice-Chair and Member, American Society of Hematology Scientific Committee on Hematopathology and Clinical Laboratory Hematology
Former Director, Training Program in Adult Hematology, McMaster University
Member of the American Society for Hematology, Canadian Hematology Society, International Society on Thrombosis and Hemostasis, International Society of Laboratory Hematology, World Federation of Hemophilia
Former Associate Editor for Seminars in Thrombosis
Former Section Editor for Hemostasis and Thrombosis and Haemostasis

Education and Qualifications

Diploma in Medical Laboratory Technology from Dawson College (Highest Achievement)
B.Sc. and M.D. *cum laude* from the University of Western Ontario
Ph.D. from McMaster University (Gold Medal)
Specialist in Internal Medicine, Royal College of Physicians and Surgeons of Canada
Subspecialty Certificate in Hematology, Royal College of Physicians and Surgeons of Canada
Certification in Internal Medicine, American Board of Internal Medicine
Certification in Hematology, American Board of Internal Medicine

Areas of Interest

I have a strong interest in laboratory medicine, clinical and laboratory hematology and in hemostasis and thrombosis, including bleeding disorders and the molecular mechanisms of platelet function. On behalf of the International Society for Laboratory Hematology, I have been leading a grant project on developing online education, mentorship and networking programs to strengthen supports for the laboratory hematology community worldwide. I have a strong interest in promoting laboratory medicine and in promoting the careers of others, particularly those of graduate students, postdoctoral fellows, emerging clinician investigators and laboratory physicians.
